Jbl studio 590 cherry for sale

The image is not available for Color: Design Technology Guide Options Placement Options Technology Guide JBL Studio Series: The JBL Studio 590 floor-standing speaker shares critical design features with professional JBL speakers you can find and listen to in cinemas and concert venues. The JBL Studio Series speaker offers dynamic realism & dimensional precision that closely replicates the experience of a movie or live music performance. Two-way floor-standing speaker: The JBL Studio 590 floor-standing loudspeaker features two 8 low-frequency woofers and a high-frequency compression guide surrounded by a glass-filled Bi-Radial horn; a combination that provides crisp, focused, precise sound dimensions. High Frequency Compression Driver/Horn System: The JBL Studio 590 floor-standing loudspeaker features a 1 compression guide with a neodymium magnet and a piece of Teonex aperture in a bi-radial glass ABS horn. 1 High-frequency compression driver: The Studio 590 floor-standing loudspeaker compression driver reduces distortion and provides a wider dynamic range than is possible from conventional high-frequency and mid-range drivers. The tweeter includes a single-seater Teonex aperture/surround assembly equipped with a 1 voice coil that can deliver enhanced vocal articulation. Glass-filled ABS B-Radial high-frequency horn: Horn-shaped loudspeaker designs optimize high-frequency output, directing sound to the listener with absolute accuracy, thus eliminating reverb, reflections from walls, and other objects. The Studio 590 floor speaker features a high-frequency glass abs bi-radial horn that provides professional-grade sound to your home. Double Low Frequency Woofers: The JBL Studio 590 floor-standing loudspeaker features dual PolyPlastics woofers with symmetrical field geometry (SFG) magnet structures, cast-aluminum frames, and rubber surrounds. Two 8 Streaks PolyPlas Woofers: The Studio 590 floor-standing loudspeaker offers precise low-frequency sounds from double 8 streaks polyplastic woofers. The ribs improve strength while reducing distortion. The result is rich, articulated bass. Symmetrical field geometry magnet (SFG) assembly: Thanks to a heavy symmetrical band of field geometry magnets (SFG), the low-frequency speaker with studio 590 floor-based speaker offers highly focused bass. The result is pristine, articulate sound. Non-Echo Cast-Aluminum Frame: Every 8 woofer features a non-acoustic cast-aluminum frame for clean, strong bass response. Rubber frames: Woofer polyplasts ribbed sticks employ a rubber frame for long string excursion and extended bass response. Low Loss, Two-Way Crossover Network: Studio 590 Floor-Standing Low Loudspeaker two-way crossover network ensures a clean transition for sound coming from individual low-frequency and high-frequency drivers, thereby reducing distortion while improving Voice match: Crafted and voice-matched with other JBL Studio 5 series speakers, the Studio 590 floor speaker is powerful, accurate and designed to make a dramatic design statement in any listening environment. Housing Design Durable 3/4 MDF Enclosure: The JBL Studio 590 floor-standing loudspeaker uses a rigid, heavy-strap housing with non-parallel surfaces to reduce unwanted resonating. Bass Reflex Design: The floor-based studio 590 speaker uses a bass reflex (ported) design desk with dual back-facing bass ports that increases performance and expands bass response. There are two port tube inserts included to reduce the amount of bass output (50Hz-100Hz) from the cabinet. Detachable grille: The floor-based speaker can be used with or without the detachable fabric mask. When not using the fabric mask, a plastic cosmetic cover is provided. Colors: The 590 floor-standing speaker is available in a black or cherry wood-grain vinyl finish (both contain black grilles). Dual Gold-Plated Binding Posts Connections: The JBL Studio 590 floor-standing loudspeaker will work with various power amplifiers and receivers at home, with single cable or two wire function. The studio 590 floor-standing loudspeaker is mounted two sets of gilded 5-way binding positions attached to gilded jumpers. Using dual 5-way connectors, you can two-amp or bi-wire the speaker. Gold-plated 5-way binding positions will accept bare wire, pin clips, shovel fasteners, or banana plugs (single/double). Note: Make sure you remove the gold-plated jumpers when the speaker is two cables/two hold. Color-coded: Dual 5-way binding posts are color-coded (red/black) for easy identification between positive and negative. Positioning options: For best results, place the speakers 6' to 10' apart. Fishing the speakers towards the listening position can improve stereo display. The speakers will produce the most accurate stereo soundstage when the angle between the listener and the speakers is between 40° and 60°. Generally, the bass output will increase as the speaker moves closer to a wall or corner. For best performance, JBL recommends placing the speakers at least 20 away from the side walls. Rubber legs: The JBL Studio 590 floor-upright loudspeaker comes with 4 rubber legs already installed. Rubber feet are used when placing the speaker on a hard surface, such as your hardwood or tile floor. Metal floor pins: Four metal pins are provided for use when you place the floor-standing speaker on a carpeted surface. Using the pins disconnects the floor and prevents unwanted acoustic damping. The metal pins add 0.1875 to the height of the speaker. Rubber legs should be removed before installing sharp feet. Magnetically shielded: The speaker is magnetically shielded, allowing you to place it near any TV without distorting the image. JBL Studio 590 Double 8 8 High Frequency Speaker JBL® Studio 590 floor speaker brings professional-quality sound to the home experience. Studio 590 uses the technology developed by JBL engineers for pro-sound speakers to provide accurate, powerful sound in your living room. The Studio 590 floorstanding speaker is a perfect complement to other members of the Studio 5 series, including the Studio 530 shelf and the Studio 520C center-channel speakers. The Studio 590 features a 1-inch (25mm) tweeter mounted on a glass-filled Bi-Radial® horn - the same technology used in JBL concert sound systems - to deliver concise, continuous high frequencies. A pair of 8-inch (200mm) PolyPlastics™ knots with symmetrical field geometry™ (SFG) magnet assemblies handle low frequencies.25 - 250 watts proposed rangeJBL power amplifier engineers designed the Studio 590 floor speaker to deliver enhanced, room filling sound from a compatible AVR (audio/video receiver) or 25 to 250 watt power amplifier, whether you're using Studio 590 as a standalone unit or as part of a surround sound system. Double 8 (200mm) streaks of PolyPlastic woofer bass knots affect more than just your ears. It echoes through your entire body, creating a sonic landscape that you can feel as well as hear. The floor-based JBL Studio 590 speaker delivers precise low-frequency sounds from an 8-inch (200-millimeter) ribbed pair. The ribs improve strength while reducing distortion. The result is rich, powerful, articulated bass. Symmetrical field geometry (SFG) magnet assembly Recover in a heavy duty symmetrical field geometry (SFG) magnet assembly, the studio 590 floorstanding loudspeaker of pair of low frequency woofers delivers highly focused bass. The result is pristine, articulate sound. Everyone's concerned about Compression guides on a horn to deliver the huge amounts of high impact, high-precision audio and live music experience that require large audiences and critical listeners. Now JBL Studio 5 series speakers, headphones designed by renowned JBL chief engineer Greg Timbers, continue this performance-proven tradition. The JBL Studio 5 series features leading professional speaker technology in modern design, while being very affordable. The JBL Studio 590 loudspeaker combines a 25mm (1) HF compression driver and Bi-Radial® horn with dual 200mm (8) cast-frame symmetrical field geometry (SFG) woofers to deliver extremely lively performance. Ideal for both music and film systems, studio 590 floor-supported speakers are powerful, accurate and decorated to make an overwhelming statement in any listening environment.
